# SPECIAL RULES AND REGULATIONS.

Applicable to all Divisions, and Superseding General Rules and Regulations, which are Inconsistent Therewith.

**RIGHTS OF TRAINS.**—East-bound trains have absolute right of track over West-bound trains of the same or inferior class. Trains running on double track will use right hand track.

1. **TRAIN WORK.**—Trains must be made up systematically in station order, which order will be preserved in taking or leaving cars. In loading freight it must, as far as practicable, be consolidated in full car loads and occupy the least number of cars required, irrespective of other cars having to go empty in the same direction. Conductors must observe the above in loading local freight, as well as to transfer lightly loaded cars. Agents at way stations must hold small lots of freight to load on trains instead of loading in cars at station. Agents at district terminals will transfer and consolidate the contents of lightly loaded cars. Local Freight trains will stop, on signal, at all stations.

2. Not more than two engines must be coupled to one Passenger train. If more power is required, trains must be divided.

3. **SPEED OF TRAINS.**—Trains must not exceed schedule time within the corporate limits of towns or cities, and all trains when approaching stations where switch engines are employed, must be under full control, expecting to find main line blocked.

Special Passenger trains and Light Engines must not exceed the running time of First Class trains, nor Extra Freight and Work trains that of Third Class trains.

4. **PASSENGERS ON FREIGHT TRAINS.**—Passengers will be carried only on freight trains designated in Division Special Rules subject to the conditions of General Rule No. 174. Passengers taking freight trains should be informed that cabooses will not be pulled up to platform to take or deliver Passengers or Baggage.

5. **AIR-BRAKES.**—The automatic air-brake must be used on Passenger trains, and on Broad Gauge Freight trains having cars so equipped, and pressure retaining valves must be applied before descending heavy grades. In Broad Gauge Freight trains, when only a portion of the cars are so equipped, these must be trained next to the engine, and care exercised in taking up slack of train when reducing speed.

The air hose when not coupled between cars must be coupled to dummy coupling provided for that purpose.—See Question No. 1, Air-Brake Instructions.

Straight air will be used on Narrow Gauge Mixed and Freight trains.

Air-brakes must be tested on trains before leaving terminal stations, as required by Air-Brake Instructions.

When double-headers are run the air must be coupled to both engines, and forward engineman must operate the air-brake.

Pushing engines must always have air-brake coupled.

6. **CROSSING RULES.**—Special rules governing grade crossings do not cancel Rule 94, General Regulations, requiring all trains and engines to stop at such crossings, except S. F. & Colo. & So. crossings No. 1 and No. 2, and A. T. & S. F. No. 5, where it is not expected that trains will make the usual crossing stop when signals are set at safety, but must run slowly with trains under full control.

Before entering upon Union Depot tracks at Denver and Pueblo, all trains and light engines will come to **FULL STOP** and receive proper signal from Switch Tender before proceeding.
