Westward Trains are superior to Trains of the same class in the opposite direction.—See Rule 72. Train movements between North Jct. and South Jct. and between Metolius and Bend will be governed by Rules, Regulations and Time Table of Oregon Trunk Railway. Trains will not exceed speed of 15 miles per hour over Willow Creek viaduct between Madras and Metolius. Trains 35 and 36 will stop on flag at Truman, Shearers Bridge, Ketchum and Harris. Passenger trains will not exceed schedule time between Gateway and South Jct.

Eastward Trains are superior to Trains of the same class in the opposite direction.—See Rule 72.
No clearance will be issued at Montesano or South Montesano for Montesano branch trains.

SPECIAL INSTRUCTIONS

- No. 1. **Special Instructions supersede "Rules and Regulations of the Transportation Department."**
- No. 2. Referring to Rule 221-A, all trains must obtain clearance card at Arlington and Hood River. Unnecessary to whistle for train order signal at these stations. Trains will not whistle for train order signal at Aberdeen, Cosmopolis and Independence but will be governed by position of signal at these stations. Referring to Rule 221, on branch lines train order signal lights will not be kept burning after passage of regular trains for the day.
- No. 3. Referring to Rule 504, trains will wait five minutes after flagman has departed.
- No. 4. White flag displayed, will indicate cars or L. C. L. freight to be moved. Trains doing local work will be governed accordingly.
- No. 5. All trains (except passenger) consisting of more than 15 cars will cut off engine to take water, and will also cut off way cars before spotting.
- No. 6. A buffer car (not to be occupied by passengers) must be used on all passenger trains between the locomotive and coaches.
- No. 7. Trainmen and Enginemen are subject to the Rules and Regulations of Northern Pacific Terminal Co. while in their yard.
- No. 8. All Trains and Engines will approach crossing of United Railway Co. track on Front Street, Portland, prepared to stop before going over crossing, expecting to find crossing occupied.
- No. 9. Helper engineers must be furnished copies of all train orders affecting movements of train while being helped. Conductors will be governed accordingly.
- No. 10. Helper engines on passenger trains must be coupled on ahead of the regular engine; this will not apply to switching engines pushing passenger trains on East Portland Hill.
- No. 11. Train registers must not be used as a means of identifying extra trains.
- No. 12. Second District trains will not obtain clearance at Portland or North Portland Jct.
- No. 13. All trains must stop and receive proceed signal from bridge tender before passing on to draw of Montesano Bridge, and westward trains will be so governed at Aberdeen Bridge.
- No. 14. Sand must not be used on draw bridges.
- No. 15. Second Class trains and Extra trains only will register at Cosmopolis.
- No. 16. Freight trains going to Montesano Branch will leave their trains at South Montesano, except such cars as are to be used on branch.
- No. 17. Junction switch at Helsing Junction will be left set and locked for line to Centralia. Junction switch at Tacoma Junction will be left set for C. M. & St. P. track. O.-W. R. & N. switch west of N. P. crossing at Blakeslee Junction will be left set for N. P. track to Centralia. O.-W. R. & N. switch east of N. P. crossing at Blakeslee Junction will be left set for O.-W. R. & N. track. Wye switch on Montesano Branch will be left set for east leg of wye. Double track switch, Aberdeen, located 250 feet east of passenger station, will be left set for eastward trains.
- No. 18. Black River is initial station for all eastward trains. Argo is initial station for C. M. & St. P. eastward trains. First class trains will register by registering ticket (Form 2642) at Black River. O.-W. R. & N. eastward first class trains will procure check of register (Form 2529) from operator at Black River.
- No. 19. Within Automatic Block Signal Limits extra trains may pass or run ahead of second class trains without receiving a train order to do so.
- No. 20. When passing over Willamette River Bridge between Portland and East Portland, Conductor or Rear Brakeman will remain at rear of train with hand on air valve of tail hose so that emergency brake can be applied if necessary.

SPEED RESTRICTIONS

- No. 21. Passenger trains, mail and express trains and light engines must not exceed a speed of 50 miles per hour and all other trains must not exceed a speed of 30 miles per hour.
- No. 22. No trains must exceed a speed of 30 miles per hour around 6, 7 and 8 degree curves and 25 miles per hour around 9 and 10 degree curves.
- No. 23. In any class of service, engines of Consolidation and Mikado class must not exceed a speed of 30 miles per hour and engines of Mallet class must not exceed a speed of 12 miles per hour.
- No. 24. Maximum speed on descending grades: on Shaniko Branch, Klondyke to Gibson, passenger trains 25 miles per hour, freight trains 12 miles per hour, and Gibson to Biggs, passenger trains 20 miles per hour and freight trains 10 miles per hour; on Condon Branch, Mile Post 37 to Mile Post 29, passenger trains 25 miles per hour, freight trains 12 miles per hour, and Mile Post 20 to Rock Creek, passenger trains 25 miles per hour and freight trains 12 miles per hour.
- No. 25. Passenger trains must not exceed a speed of 20 miles per hour on East Portland Hill when helper engine is used on rear of train, and must cut off such helper just east of Sandy Road crossing, except in cases of unusually heavy trains. Helper engineers will not work more steam than is absolutely necessary.
- No. 26. Passenger trains must not exceed a speed of 30 miles per hour and freight trains 20 miles per hour between Eagle Creek and Mile Post 42.
- No. 27. Westward trains will not exceed a speed of 15 miles per hour through turnout at either end of gauntlet track over Des Chutes River Bridge.
- No. 28. Eastward trains will not exceed a speed of 15 miles per hour through turnout onto eastward track at Crates.
- No. 29. When sand is blowing, engineers will run with great care and under control where they cannot see track is clear. The same precautions must be observed in passing points where there is a liability of track being obstructed by falling rock or land slides.
- No. 30. Slow boards and caution signals will be erected one-fourth mile from the point which they are intended to cover. Permanent slow boards are erected as follows: First District—Tunnel No. 3; Second District—Mile Posts 14 and 44, Grays Harbor Branch.
- No. 31. Westward trains will stop before crossing Sandy Road, between M. P. 5 and 6.
- No. 32. Trains handling logs will not exceed a speed of 15 miles per hour at any point.

SPECIAL INSTRUCTIONS—Continued

YARDS.

No. 33. Movements in Yards. All trains, yard engines, light engines, etc., must proceed under control in both directions between Portland and East Portland, East Portland and St. Johns Jct., Seattle and Georgetown, Tacoma Jct. and Tidewater, Helsing Jct. and Independence, South Montesano and Montesano, Cosmopolis and Aberdeen, and within yards at Albina, East Portland, North Portland Jct., Kenton, The Dalles, Des Chutes River Bridge, Biggs, Umatilla, South Junction and Tono.

Protection at Other Stations. Where yard limit signs are not erected, the station (S) whistling posts will be considered the yard limits. Stations referred to are those shown on the face of time table schedule. Extra trains must approach such stations expecting to find main track occupied without flag protection, and should any collision occur, the responsibility will rest upon the extra train approaching the station. Trains occupying main track at such stations must protect against regular trains and will also be governed by rules in regard to meeting and right-of-track orders.

The limits of Albina yard extend from East Portland Junction Switch to St. Johns Jct.

The limits of North Portland Jct. yard extend from east portal of tunnel to North Portland Jct.

The limits of Kenton yard extend from Peninsula Jct. to yard limit sign located about 500 feet east of P. R. L. & P. Ry. overhead crossing.

Yard limits extend from Seattle Passenger Station to one-quarter mile west of west switch of Georgetown siding.

Yard limits extend from Tacoma Junction to Northern Pacific crossing at Tidewater.

Yard limits extend from C. M. & St. P. switch Helsing Junction to Independence.

Yard limits extend one-half mile east of South Montesano to one-half mile west of South Montesano, including Montesano Branch.

Yard limits extend from one-quarter mile east of Cosmopolis to one-quarter mile west of Aberdeen passenger station on eastward main track.

Yard limits extend from one-half mile west of Tono to end of track east of Tono.

MOVEMENTS BETWEEN ST. JOHNS JCT. AND PENINSULA JCT.

No. 34. The Train Staff System is in operation between St. Johns Jct. and Peninsula Jct. All trains, yard engines and light engines moving between these points will be governed by Train Staff System Rules.

St. Johns Jct. and Peninsula Jct. are staff stations.

Train order semaphores at St. Johns Jct. and Peninsula Jct. indicate the limits of staff block.

Cars must not be shoved through tunnel ahead of engine.

Headlights must be kept burning on all engines run between St. Johns Jct. and Peninsula Jct. during day and night.

Westward trains will be governed by position of semaphore signals located 600 feet east of east portal of tunnel and not proceed until signal is clear, securing staff at staff station.

When approaching staff stations, should view be obstructed by reason of snow, fog, etc., and engineer is doubtful as to location, he must stop, and if necessary send flagman ahead to note position of signals and establish whereabouts of train.

AIR BRAKES.

No. 35. Trainmen must provide themselves with a supply of **Defective Air Brake Cards**, Form No. 2399, and must apply them to brakes cut out or found defective while in their charge. As a general rule the trainman who discovers defective or cut out brakes is aware of the nature of defects, consequently is in a position to furnish all the information required on the tags and should be particular to do so as it is very valuable and necessary information for car inspectors or for other trains handling such cars; otherwise much time is wasted testing for trouble or reason for brakes being defective or cut out.

No. 36. Trainmen must be particular to know that air is cut in on all cars picked up, and before descending heavy grades must know that all good-order air brakes are cut into the train line. Hand brakes must be used on non-air and cut-out cars descending heavy grades.

No. 37. Pressure Retaining Valves must be used on all freight trains descending grades between: Montavilla and East Portland; Nigger Ridge and McDonalds; Klondyke and Biggs; Sandon and Hay Canyon; Condon and Rock Creek. On passenger trains descending grades between Wasco and Biggs, Condon and Rock Creek.

No. 38. The braking power on engines helping or pushing trains must be cut into the train line and particular attention must be given to cutting in of driving brakes. When helpers are used ahead of regular engine the regular engineer will set air on train to be released by helper engineer, and vice versa when this helper cuts off.

No. 39. All westward freight trains will stop at Gibson and inspect train as per Rule 16, Rules and Regulations Governing Air Brakes, etc.

TRAIN ORDERS.

No. 40. Within Automatic Block Signal limits between Umatilla and Portland and between Black River and Seattle:

Form "19" train order may be issued to restrict the superiority of a train, except that Form 31 must be used (1) when orders are delivered at a non-telegraph or closed telegraph station. (See Rule 217). (2) When necessary to restrict a train which has been cleared or the engine of which has passed train order signal. (See Rule 219). (3) When issuing an order Form "G", example 3. (4) When giving any train right over all trains. (5) When reducing a time order where necessary that dispatcher have signature of superior trains before completing order to an inferior train.

Operator will fill out clearance, designating thereon numbers of all orders, (Forms 19 and 31), repeat to Dispatcher train and order numbers as they appear on clearance and obtain O. K. with time and Superintendent's initials, writing same before delivery in blank space. Operator will retain carbon copy of clearance.

Dispatcher must write train and order numbers in his train order book as transmitted by operator from clearance, and must designate time clearance was made O. K., not transmitting O. K. unless operator repeats numbers of all orders to be delivered to the train to which clearance is addressed.

When "19" order restricting superiority is issued at station where superiority is restricted, train must be stopped by operator before delivery of order.

Conductor's and Engineer's attention is called to the importance of approaching at a moderate rate of speed telegraph offices where orders are to be received. Also to the necessity of carefully checking clearance to ascertain positively that clearance is properly addressed and that orders received are those called for by clearance.

CLASS.

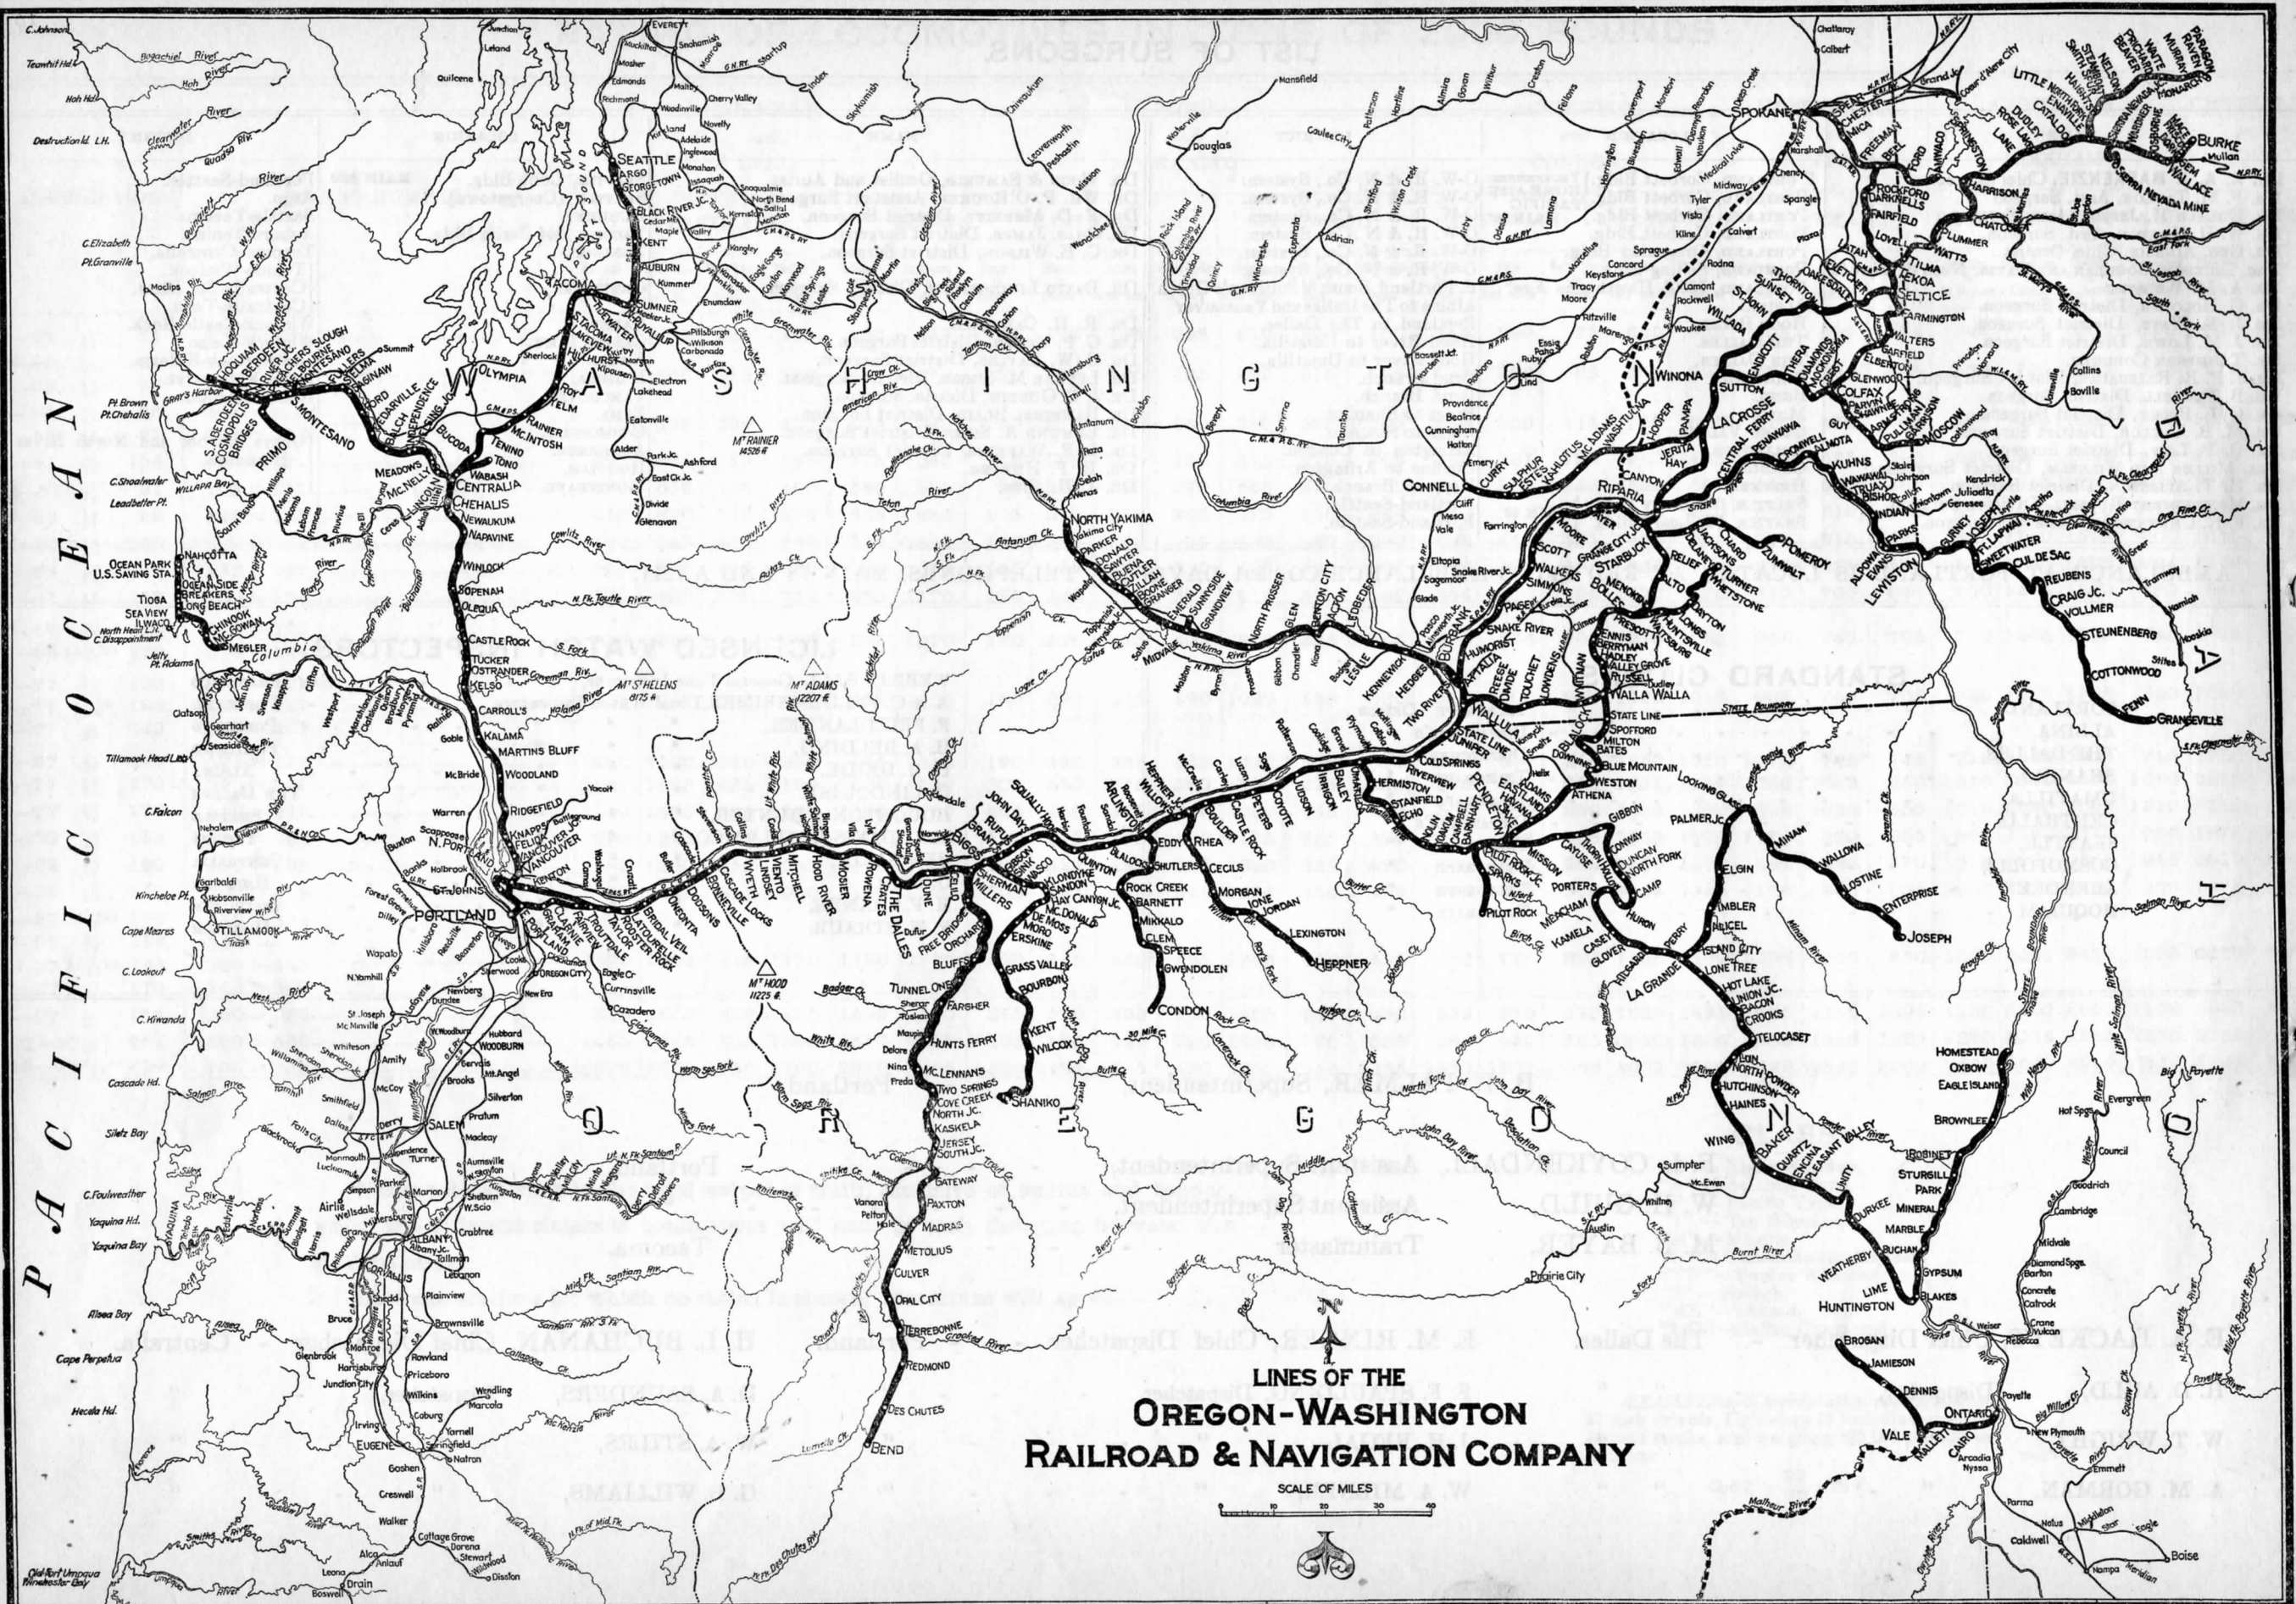

- "E" — Eight Wheelers.
- "A" — Atlantic Type.
- "P" — Pacific Type.
- "T" — Ten Wheeler.
- "M" — Moguls.
- "C" — Consolidation Engines.
- "TW" — Twelve Wheelers.
- "S" — Switch.
- "MK" — Mikado.
- "MC" — Mallet Compound.

These ratings include the total weight of train, exclusive of engine and tender, which the different classes of locomotives will haul in each direction between the stations shown.

Between stations for which no rating is shown, maximum will apply.

EXAMPLE:—Consolidation engine having 57 inch drivers, cylinders 22 inch diameter and 30 inch stroke, and weighing 187,000 pounds on Drivers:

C-57 $\frac{22}{30}$ 187
