SPEEDS SHOWN BELOW ARE MAXIMUM SPEEDS PERMITTED AND MUST NOT BE EXCEEDED:

- Designation "Str."** —Train with Diesel-electric locomotive and all light-weight roller-bearing passenger train equipment.
- Designation "DE-Psgr."** —Train with Diesel-electric locomotive and all passenger train equipment, any car of which is not light-weight roller-bearing.
- Designation "Psgr."** —Train with steam locomotive and all passenger train equipment.
- Designation "Frt."** —Train with freight cars; train with caboose only; locomotive without cars.

When Diesel-electric passenger locomotive is operated without train, a speed of 60 miles per hour must not be exceeded, and all lesser speed restrictions specified for "Psgr." trains will govern.

On double track, a train or engine moving on a main track in a direction opposite to that in which trains would normally move, must not exceed 20 miles per hour.

When a freight engine is used in passenger service on a branch line, the speed specified under "Frt." must not be exceeded.

Where rules, special rules or bulletin require movement at restricted speed, movement must be made prepared to stop short of train, obstruction or switch not properly lined, and be on lookout for broken rail or anything that may affect movement of train, but a speed of 15 miles per hour must not be exceeded.
