~~~~~

During WWII, many locomotives were produced by Baldwin [and other U.S. builders] for the military. With the end of the war, many of these locomotives remained in Europe. There were also locomotives built for the U.S. and British War Departments, which were delivered to Europe. Post war deliveries, and real locations, also sent locomotives to the Far east. These are the "reporting marks" for various railways

~~~~~

Between 1959 and 1961, 50 of the above Soviet locomotives were transferred to North Korea

In 1962, the additional 34 locomotives were shipped to North Korea, with 80 renumbered in the #3101 >> #3180 series with the additional set aside as spares

Locomotives were re-gauged by the North Koreans at the "Ulan Ude" and "Chong-jin" Shops and were classed as "SchU"

The following locomotives - which went to China - were on order and built for the U.S. Army. With WWII ending, they were transferred to the U.S. Treasury Department, Procurement Division, which, in turn turned them over to the United Nations Relief & Rehabilitation which then sent them to mainland China

~~~~~

#76088 was the last Baldwin STEAM locomotive built

~~~~~

Locomotive production ended at the Baldwin Locomotive Works at Eddystone, Pennsylvania, with the delivery of the 35-ton Diesel/Hydraulic Marble Cliff Quarries #27 and #28, Baldwin #76149 and #76150, in October and December 1956.

Baldwin #76151 was reported to have been built from parts still on hand at Eddystone. Sold in the 1970's, it was still active at the Baldwin facility in the mid-1960's.

The Baldwin-Hamilton Corp. maintained a parts business for many years after cessation of locomotive production
