(CANCELS No. G-23-14)

Omaha, Nebraska, October 1, 1953

List of Stations and Station Numbers

NORTHWESTERN DISTRICT

TO ALL CONCERNED:

Effective at once:

1. The following is a list of station numbers that should be used on all reports where station numbers are required in connection with the reporting of train, locomotive or car movements. The principal reports involved are:

Form 1216 and 1216-1, "Conductor's Car and Tonnage Report".

Form 1217, "Daily Report of Train, Motor Car and Locomotive Movements".

Form 4641 and 4641-1, "Passenger Conductor's Car Report".

Form 4683, "Monthly Inventory All Cars".

2. Numbers of stations on the principal main line between Council Bluffs, Iowa and Seattle, Washington are without prefixes. The prefixes, or the absence thereof for the main line Council Bluffs to Seattle, signify the portion of the main line, or the branch line, on which the station is located. The remainder of the station number signifies the distance in miles from the station shown in the caption of the station number column. The mileages for the portion of the main line, Hinkle to Spokane, have been revised to show the distance from Hinkle.

3. The prefix numbers for each portion of the main line and each branch are shown below for ready reference:

4. Particular attention is called to points between which trains may move via alternate routes and the notes herein containing instructions as to the correct manner of reporting movements of such trains and cars when such alternate movements are made. For this district see notes on pages 4, 5, 8, 13 and 14. In all cases not referred to in the notes, where trains move via an indirect or unusual route, appropriate information should be shown on Form 1216, Form 1216-1, Form 4641 or Form 4641-1 to indicate the route of the movement.

5. The prefix numbers, both for main line and branch line stations, are an essential part of the station number and should be shown in all cases.
